INTRODUCTION TO CANTILIBRA™

Design that stands the test of time.

Cantilibra™ is an intelligently designed shelving system that has been designed with care, to function with integrity over a long period of time.

This purity of purpose is what has created the valued Cantilibra™ look, with a flexibility to achieve the feel you want for your space.

Cantilibra™ is the antithesis of fashion. There are few products, designs or brands that remain relevant and fresh yet relatively unchanged over decades. Cantilibra™ shelving is exactly that. And has been recommended by librarians for librarians for over 20-years. And is installed in over 2000 educational, medical and community libraries worldwide.

The original design by Rudolf Koreska still forms the basis of today's innovative range. Now manufactured in the UK, Cantilibra™ has stood the test of time – yet we continue to develop options to create diverse and attractive aesthetics. It is configurable, adaptable and upgradeable.

Function. Value for money.
Built to last. **That's Cantilibra™**

WHAT DO YOU WANT FROM A SHELVING SYSTEM?

Versatility to create your own aesthetic?

The components of Cantilibra™ shelves, uprights and brackets, can be finished in a wide range of colours and materials. They can also be complemented by additional items such as standard or custom-made end panels, castors, lighting and a huge range of optional accessories to provide a balance of style and function for your library space.

The Storyhouse, Chester

Classic design, built to last – a great investment?

Built to very high standards from top quality steel and with a classic, timeless design, Cantilibra™ shelving is an investment that will show an impressive return over time. In libraries, schools, universities and offices worldwide, you'll find Cantilibra™ shelves still looking good and working hard after twenty, thirty, forty or more years. **We offer a full ten-year warranty against defects in workmanship or materials.**

Keep a clear conscience with a sustainable choice?

Functionality, appearance and longevity are not the only criteria by which a design can be judged as successful. **Cantilibra™ shelving is manufactured from steel, the world's most recyclable material.** So, you can specify Cantilibra™ with confidence and a clear conscience.

UK manufacture, lower costs & faster delivery?

Cantilibra™ is manufactured in the UK at our ISO 9001 accredited factory – which means **we can offer lead times from as little as four weeks.** This makes Cantilibra™ the most cost-effective cantilever steel library shelving system on the market.

BIM level 2 models and data available?

BIM is making architectural specification simpler and more predictable. Cantilibra™ shelving offers full BIM functionality, with models downloadable from our website.

Book supports

There is a choice of book support styles available.

Signage

Wide range of signage options and integrated lighting also available.

Attention to detail is what makes Cantilibra™ so versatile

① Wide range of integrated system components

Whatever you need to store or display, there's a Cantilibra™ component specifically designed to suit - books of all sizes; magazines; files; digital media; archives; historic collections and much more.

② Square or tapered brackets

As standard, choose between the original classic tapered shape or our squared off brackets in line with European style trends as shown here.

③ Steel shelves that won't deflect under heavy loads

Cantilibra™ shelves have a maximum load capacity of 60Kg, so even when fully loaded they will keep their shape.

④ End panels to suit your design

Choose from our standard range of coloured MFC panels. Or if you're looking for something extra, consider painted or graphic end panels or a wood veneer. Alternatively, go 'high-tech' with drilled steel or acrylic. Your space. Your design.

⑤ Plain or profile shelf fronts

Choose the practicality and convenience of channelled shelf fronts to hold shelf guiding or go for the minimalist look with sleek plain fronts.

⑥ Durable powder coat finish

The surface of Cantilibra™ steel is durable and impact resistant with a non-slip finish.

1 > CHOOSE YOUR COMPONENTS

It really is that simple!

Select a single or double-sided
(standard, display or display and store)
starter bay from three different heights
(1200, 1500 and 1800 mm).

Then you can link these bays to create runs of straight shelving, shapes or zones using our add on shelving units.

The versatility of the system means you can maximise your space by fitting shelving even to the most awkward of spaces.

We are happy to help
you select shelving to fit
perfectly into your space

Sample with 1500 mm (high) shelves

Single sided Starter

Double sided Starter

2 > SELECT YOUR END PANELS OR BAY END DISPLAYERS

Define sections, genres, and aesthetic in your library space by personalising the end panels of your shelving.

Create additional way finding using colour and bespoke graphics on our plain end panels or choose the slatted option with space for leaflet holders – the only limit is your imagination...

We also include options to add additional display shelf space to highlight specific titles or new in materials by selecting our end of bay displayers.

Colours available for the end and bay end panels

- | | | |
|--|---|--|
|  Smoke blue
U540 |  Platinum white

3 > ADD YOUR ACCESSORIES

Explore the full range, options, and accessories, online. Scan the QR code

To truly make the system your own, we offer a wide range of useful accessories.

You can use our handy pre-defined 'kits' to add alternative shelving into your existing system – changing a flat shelf to a display or vice versa or add in a new element such as a shelf to display games and DVD's.

We also recommend a number of book supports, including our Demco magnetic supports.

CREATE A BESPOKE AESTHETIC WITH VERSATILE CANTILIBRA™

Looking to add the WOW factor?

Our team can assist you to create a unique library space using our versatile Cantilibra™ system.

Because our shelving components can be finished in a wide range of colours and materials, **creating a scheme unique to your space is simple.**

Standard shelving can be complemented by a wide range of additional accessories. Shelving end bays can be personalised with both standard or custom-made end panels, which can feature graphics, colours and photography, display shelving, lighting, or wayfinding information.

Multiple options for storage and display makes location and retrieval of items easier – we have specific options for a wide-range of materials – large format, DVD's, games, CD's, magazines etc.

Many of our accessories are exclusive to the WF Education Cantilibra™ range.

We're here to help!

Construction Zinc plated pressed steel swivel castors. White polypropylene wheel with plain bearing and full-face thread guards.
Dimensions 100mm diameter wheels. 128mm overall working height.

Surface Finish

All surfaces pre-treated with iron phosphate for anti corrosion protection and powder coated in epoxy powder coated to a thickness of 35 to 60 microns. This provides a matte, anti-slip surface.

BIM

BIM level 2 models of Cantilibra™ shelving can be supplied or downloaded from our website at wf-education.com

Quality Standards

All Cantilibra™ components are manufactured under an ISO9001 accredited process, to meet relevant British and European standards. The system has also undergone seismic testing in Japan and has been certified to withstand an earthquake reading of 9 on the Richter scale.

Warranty

Cantilibra™ shelving is supplied with a ten-year warranty against defects in workmanship or materials subject to terms and conditions.

Ordering & Logistics

Cantilibra™ shelving is manufactured by us in the UK. This allows us to quote very short lead times as short as four weeks*, even on large orders. For larger projects, your order will be taken care of by our Project team – from initial enquiry to delivery and installation.

***Subject to individual requirements and specification:** Our policy is one of continual improvement of design, material and construction. Therefore, we reserve the right to withdraw our product or alter specifications without notice. Every effort has been made to ensure the accuracy of all data supplied. E&OE.

TOGETHER WE CAN CREATE AMAZING SPACES

Talk to us about flexible space planning, utilisation and our mobile modular shelving range.

The WF Spaces team are award-winning interior designers, space planners, and fit-out specialists.

We design and build learning and community spaces, from bespoke new builds to entire refurbishment projects.

Whether we're designing and manufacturing a learning environment, equipping a Design & Technology workshop or creating a library space,

our knowledge, expertise, and attention to detail is guaranteed.

Our customers talk about the quality of our designs. Our attention to detail makes our interiors stand out – “You can tell a WF Space!”.
