Access management
locks: 2 per door and 1 per slot

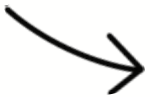

Wall models are also available

1.

How do you choose your model?

**Available only on
shop.wf-education.com/libraries**

Question checklist

Depending on the answers, adopt the return box that suits you best!

What are my opening hours?

If you have limited opening hours then it is likely you will need a bigger model so you let your patrons return more books while you're closed.

Who uses your library most often? Students, families or those who work 9-5 may not be able to visit your library during opening hours very often, so may rely on these book returns a lot. A bigger model would give them plenty of space to return everything!

What is the profile of my users?

How is my building laid out?

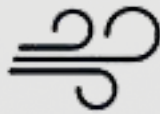

If you don't have the space for one of our book returns, you could opt for a wall box which does the same job!

Need a strong return box that stands up to any test?

Rain, wind, sun, heat, snow, cold... our WF book returns are resistant to any type of weather thanks to their composition in galvanized steel and their epoxy powder coating.

Am I subject to bad weather?

Could vandalism be a problem?

Solid and secured by their locking system, it is impossible to open our WF book returns!

If you fear external deterioration, our single or duo wall boxes only show one slot.

2.

Your feedback!

See what others think...

Find librarians feedback and testimonials about our WF book returns!

"It fits in perfectly with the service we provide our patrons. It's solid, modern looking, and blends perfectly with the architecture of our media library. We are delighted and our users are too!"

Arès media library

"The users have adopted it well, the returns box is always filled the day after we've been closed for the day. The 2 slots make it possible to accommodate separate materials so it's easy to organise afterwards"
